Summary

DevSecOps Engineer with solid background in **Process Automation (RPA)**, **Full Stack Development (Angular/NestJS)**, and Cybersecurity. Specialized in optimizing corporate workflows using Python, **AI integration (Gemini API)**, and secure cloud infrastructure. Validated by international certifications from **Cisco (CCNA, CyberOps)** and **Google**.

Experience

Cloud Systems Analyst & RPA Developer
Andean Anthracite ACE S.A.

*Trujillo, Peru (Remote/
Hybrid)
Dec 2025 – present*

- Developed **RPA bots using Python and Selenium** for massive vehicle data extraction (MTC/Sunarp), reducing manual query time by 80%.
- Implemented **Computer Vision and OCR** algorithms for automatic CAPTCHA resolution and Base64 image processing, achieving real-time unattended validation.
- Built an intelligent financial classifier using **Google Gemini API (LLM)**, achieving 95% semantic accuracy in expense categorization (fuel, supplies).
- Designed an automated fiscal query engine integrating the **SUNAT platform** for bulk validation of electronic invoices and tax deductions.

Full Stack Engineer (Angular & NestJS)
Freelance Project

*Remote
Aug 2025 – Nov 2025*

- Architected a **SPA using Angular 17+** and TypeScript, implementing modular architecture and reusable components.
- Developed a scalable **RESTful API with NestJS**, ensuring strict data validation (DTOs) and secure authentication (JWT).
- Implemented basic CI/CD pipelines for automated deployment and continuous integration.

IT Automation Specialist
Clínica San Antonio

*Trujillo, Peru
Apr 2025 – Aug 2025*

- Automated TEDEF data validation for **SUSALUD**, eliminating manual errors in insurance claim submissions.
- Administered **Windows Server 2019** security, managing Active Directory policies and automated backup routines.

Network Security Specialist
Novo Resonancia

*Trujillo, Peru
Apr 2025 – July 2025*

- Hardened perimeter security by configuring **Fortinet Firewall** rules and implementing network segmentation with VLANs.
- Ensured medical data integrity (PACS/RIS) through rigorous backup policies and access control lists (ACLs).

Python Developer & Support
ESSALUD

*Trujillo, Peru
Aug 2023 – Dec 2023*

- Developed a desktop application using **Python (PyQt)** to digitize and manage asset management forms.

- Deployed private cloud services using **Nextcloud** on Ubuntu Linux servers with Squid proxy configuration.

Education

Universidad Nacional de Trujillo

Bachelor's Degree (Outstanding Weighted Average) in Systems Engineering / Informatics

Trujillo, Peru

2019 – 2024

Certifications

Cisco Certified CyberOps Associate

2024

Cisco Certified Network Associate (CCNA)

2024

Google Cybersecurity Professional Certificate

2025

Introduction to Generative AI (Google Cloud)

2025

Skills

Languages & Backend: Python (Advanced), JavaScript/TypeScript (Node.js/NestJS), SQL, C#, Java, PHP

Frontend & Mobile: Angular 17+, React, HTML5, CSS3, Flutter (Basic)

Infrastructure & Security: Docker, Linux Hardening, Cisco IOS, Fortinet, Windows Server, Azure

AI & Automation: Google Gemini API, Selenium WebDriver, Web Scraping, Pandas, OCR

Languages: Spanish (Native), English (Technical - Advanced Reading/Writing)
